

amr+ competition

Expression of interest to enter a team in the competition

To express your interest in being selected to enter our competition, please tell us:

Who is in the team?

We are looking for teams of at least three members that bring together different disciplines - architecture/built environment, information design, human factors/ergonomics, behavioural science, psychology, linguistics, biological science, pharmacy.

Each team will benefit from the expertise of our pharmacy partner, Day Lewis, at our Ideas Lab, and will have access to material that enables understanding of public perceptions of AMR and antibiotic misuse.

Why do you want to take part?

Write 500 words explaining why you want to take part, and why your team has the right ingredients for success. You are welcome to include up to 5 pages of examples of work, or links to projects.

Assessment

The IDAPPS Investigators will select teams based on extent to which the application addresses:

*commitment to research project
design profile
collaboration
relevant skills
interest in / understanding of amr / pharmacy context*

All entrants must indicate that they are willing to accept the principles, as successful applications will be asked to abide by these. Project activities and outcomes will be photographed and used for research publications and displays

We will let entrants know during week beginning 26 March 2018 if they have been successful. All teams will get feedback on their application.

**Entries in PDF form should be sent to Miranda Mole (m.c.mole@reading.ac.uk)
by 5.00 pm on Friday 16 March 2018**
